A metalworking band saw consists of a long continuous band of, normally toothed, metal—the blade—and two or more wheels housed within the machine to drive the band. The design of band saw blades allow for even load on each individual tooth of the blade as well as agility when cutting irregular shapes. Most band saws have two wheel which

A metal bandsaw is a power saw that has long, sharp teeth along the edges of the blade that are used to cut metals and other materials. Metal bandsaws are primarily used in woodworking, metalworking and lumbering to cut wood and metal to the desired shape and size by running the material along the bed and into the path of the blade.
