What is the Biopsychosocial Model? - Definition & Example

The use of sustainable aviation fuel is currently minimal and is likely to remain limited in the short term. Sustainable aviation fuels have the potential to make an important contribution to mitigating the current and expected future environmental impacts of aviation. There is interest in 'electrofuels', which potentially constitute zero-emission alternative fuels.

Ap Bio Chapter 15 Collaboration

Nicotine is a chiral alkaloid that is naturally produced in the nightshade family of plants (most predominantly in tobacco and *Duboisia hopwoodii*) and is widely used recreationally as a stimulant and anxiolytic.As a pharmaceutical drug, it is used for smoking cessation to relieve withdrawal symptoms. Nicotine acts as a receptor agonist at most nicotinic acetylcholine receptors (nAChRs), except
