An SAS unit codenamed Zero 22, operating covertly in the war-torn badlands of northern Syria, is ambushed and massacred by a small army of mercenaries dressed like Hell's Angels Danny Black survives the massacre and back in London learns that his unit was betrayed by a mole feeding high-level military intelligence to the Russians. Like any SAS man worthy of the name, his first thought is to avenge the men who lost their lives on the Zero 22 op. He has no hesitation in accepting the mission to assassinate the man responsible for the death of his mates. Danny finds himself operating with an MI6 officer and together they embark on a high-risk, deniable mission that will require all Danny's Regiment. As the mission unfolds, however, Danny learns that darker forces are at play. He realises that what started out as a simple act of revenge is just single play in a conspiracy that will take him across continents and pit him against the insidious machinations of the most powerful men in the world.

Since Darwin's day, we've been told that sexual monogamy comes naturally to our species. Mainstream science—as well as religious and cultural institutions—has maintained that men and women evolved in families in which a man's possessions and protection were exchanged for a woman's fertility and fidelity. But this narrative is collapsing. Fewer and fewer couples are getting married, and divorce rates keep climbing as adultery and flagging libido drag down even seemingly solid marriages. How can reality be reconciled with the accepted narrative? It can't be, according to renegade thinkers Christopher Ryan and Cacilda Jethâ. While debunking almost everything we "know" about sex, they offer a bold alternative explanation in this provocative and brilliant book. Ryan and Jethâ's central contention is that human beings evolved in egalitarian groups that shared food, child care, and, often, sexual partners. Weaving together convergent, frequently overlooked evidence from anthropology, archaeology, primatology, anatomy, and psychosexuality, the authors show how far from human nature monogamy really is. Human beings everywhere and in every era have confronted the same familiar, intimate situations in surprisingly different ways. The authors expose the ancient roots of human sexuality while pointing toward a more optimistic future illuminated by our innate capacities for love, cooperation, and generosity. With intelligence, humor, and wonder, Ryan and Jethâ show how our promiscuous past haunts our struggles over monogamy, sexual orientation, and family dynamics. They explore why long-term fidelity can be so difficult for so many; why sexual passion tends to fade even as love deepens; why many middle-aged men risk everything for transient affairs with younger women; why homosexuality persists in the face of standard evolutionary logic; and what the human body reveals about the prehistoric origins of modern sexuality. In the tradition of the best historical and scientific writing, Sex at Dawn unapologetically upends unwarranted assumptions and unfounded conclusions while offering a revolutionary understanding of why we live and love as we do.

The New York Times bestselling coauthor of Sex at Dawn explores the ways in which "progress" has perverted the

way we live—how we eat, learn, feel, mate, parent, communicate, work, and die—in this “engaging, extensively documented, well-organized, and thought-provoking” (Booklist) book. Most of us have instinctive evidence the world is ending—balmy December days, face-to-face conversation replaced with heads-to-screens zomboidism, a world at constant war, a political system in disarray. We hear some myths and lies so frequently that they feel like truths: Civilization is humankind’s greatest accomplishment. Progress is undeniable. Count your blessings. You’re lucky to be alive here and now. Well, maybe we are and maybe we aren’t. Civilized to Death counters the idea that progress is inherently good, arguing that the “progress” defining our age is analogous to an advancing disease. Prehistoric life, of course, was not without serious dangers and disadvantages. Many babies died in infancy. A broken bone, infected wound, snakebite, or difficult pregnancy could be life-threatening. But ultimately, Christopher Ryan questions, were these pre-civilized dangers more murderous than modern scourges, such as car accidents, cancers, cardiovascular disease, and a technologically prolonged dying process? Civilized to Death “will make you see our so-called progress in a whole new light” (Book Riot) and adds to the timely conversation that “the way we have been living is no longer sustainable, at least as long as we want to the earth to outlive us” (Psychology Today). Ryan makes the claim that we should start looking backwards to find our way into a better future.
