*Conn had spent the millennia of his life fighting alongside his brethren as a Guardian of the Four Realms. He'd never allowed himself to imagine that he would be gifted a mate but her scent was inside him now. The intoxicating lure incited his wolf to track her and claim her in a sexual frenzy she could never deny. He refused to repeat the mistakes his brothers had made in their unions, instead he planned to fight the demands of his beast and tempt his female. Dacia had spent the years of her life as a guardian of her family's secrets. Her days were consumed with helping her siblings search for the Immortals who had escaped the God Apollo's brutal training camps with her parents thousands of years ago. They were the only hope of finding answers to questions about their lives. Questions her parents hadn't resolved before their deaths. Not in her wildest of dreams would Dacia have imagined the answers would instead find her. Or what form those answers would take. The breathtaking male who stepped out of the night and into her life was certainly not one of the hidden Immortals her parents had told of, he was so much more. Wielding both immense power and thrilling strength he aroused not only her body but the wolf hidden within. Dacia needed to find a way to trust her seductive Guardian, not only with herself, but with her family as well. But how long could she hold out against both the intensity of the mating frenzy that demanded sexual release, and the wickedly sexy male who was tempting not just her body but also her heart? Warning: This book is intended for an adult audience. It contains explicit sex; voyeurism; dirty talking males with bad language*

## Temporary Propping of Deep Excavations - Guidance on Design

*The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.*

## Open-channel Hydraulics

*Open-Channel Hydraulics, originally published in 1959, deals with the design for flow in open channels and their related structures. Covering both theory and practice, it attempts to bridge the gap that generally exists between the two. Theory is introduced first and is then applied to design problems. In many cases the application of theory is illustrated with practical examples. Theory is frequently simplified by adopting theoretically less rigorous treatments with sound concepts, by avoiding use of advanced mathematical manipulations, or by replacing such manipulations with practical numerical procedures. To facilitate understanding of the subject matter, the treatment is mostly based on the condition of one- or two-dimensional flow. The book deals mainly with American practice but also includes related information from many countries throughout the world. Material is divided into five main sections for an orderly and logical treatment of the subject: Basic Principles, Uniform Flow, Varied Flow, Rapidly Varied Flow, and Unsteady Flow. There are 67 illustrative examples, 282 illustrations, 319 problems, and 810 references. This classic textbook was the first English-language book on the subject in two decades. Open-Channel Hydraulics is a valuable text for students of engineering mechanics, hydraulics, civil, agricultural, sanitary, and mechanical engineering, and a helpful compendium for practicing engineers. Dr. Ven Te Chow was a Professor of Hydraulic Engineering and led the hydraulic engineering research and teaching programs at the University of Illinois. Through many years of experience as a teacher, engineer, researcher, writer, lecturer, and consultant, he became an internationally recognized leader in the fields of hydraulics, hydrology and hydraulic engineering. Dr. Ven Te Chow authored two technical books and more than 60 articles and papers in scientific and engineering magazines and journals. He was a member of IAHR, ASCE, AGU, AAAS, SEE, and Sigma Xi, and had been Chairman of the American Geophysical Union's Permanent Research Committee on Runoff.*

## Retention of masonry façades

*In post-WWII Russia, one boy dares to save an entire race of outlawed dogs -- the German shepherd! World War II has just ended when thirteen-year-old Mikhail finds a dying man and his German shepherd, Zasha, in the woods. It's dangerous -- some say traitorous -- to own a German dog after Germany attacked Russia, so Mikhail must keep Zasha a secret to keep her alive. But Mikhail's rival, Katia, is determined to find the dog she is sure he's hiding. At the same time, a soldier named Dimitri is breeding a new Russian dog at a nearby farm. So many dogs were lost in combat, to starvation, and in the slaughter of German dogs that the country is in dire need of every kind of dog. Dimitri, too, has suspicions of Zasha's existence, and would like nothing more than to add her to his breeding program. He'll have to compete with the armed dog thieves who are also on her trail. Mikhail's inspiring journey to save his best friend, the last German shepherd in Russia, forces him to face some of life's hardest lessons about war, hate, forgiveness, hope, love, and man's best friend.*

## *Exploring C*

*Space, and the cost of providing space, for plant and building services distribution, is often at a premium. Pressure to reduce the spatial requirements for building services installations is therefore an understandable element of the overall design process. However, considerable care is required if building services are to be designed and installed to provide adequate space for the safe and efficient maintenance of the installations. Difficulties can arise with meeting statutory levels of access to safely maintain the installation if space is inadequate. In extreme cases, a significant amount of additional work may have to be undertaken after completion of the building to ensure compliance with statutory requirements.*

Now, it seems everyone has a terrible secret. But how many people in Lowfield would kill to keep them hidden? Catherine finds herself both the sheriff's lead suspect and the killer's next target. With the help of her handsome editor, Randall, and her quirky fellow reporter, Tom, Catherine must untangle the dark roots of the murders and stop the killer who wears a neighbor's face.
