**A Life Observed** Communication is the absolutely indispensable leadership discipline. But, too often, leaders and professional communicators get mired in tactics, and fail to influence public attitudes in the ways that would help them the most. This book builds on the U.S. Marine Corps' legendary publication *Warfighting*, showing how to apply the Corps' proven leadership and strategy doctrine to all forms of public communication. The author reveals how to orient on audiences, recognizing their centers of gravity and most critical concerns. He also teaches how to integrate and succeed with all three levels of communication: strategic, operational, and tactical. He shows how to take the initiative and control the agenda, respond to events with speed and focus, use the power of maneuver, prepare and plan, and put it all together, in order to become a "habitually strategic" communicator.

her peaceful town outside Beirut. Ruba is slowly awakening to the shifting contours within her household: hardly speaking and refusing to work, her father has inexplicably withdrawn from his family in favor of his favorite armchair; her once-youthful mother looks so sad that Ruba imagines her heart must have withered like a fig in the heat; and Ruba's brother, Naji, is spending less time with Ruba than he is with older friends, some of whom carry guns. In trying to salvage her family, Ruba uncovers a secret from her father's past. It sends her on a journey far from the fantasies of youth and into a brutal reality where men kill in the name of faith and race, old wrongs remain unforgiven, and where nothing less than self-sacrifice and unity can offer survival. But as Israeli troops invade Beirut and danger moves ever closer, Ruba realizes that she alone may not be able to keep her loved ones safe. She must first save her father. "Exquisitely affecting . . . page-turningly suspenseful . . . A Girl Made of Dust is equally gripping as a poignant family drama and as a visceral depiction of living with war literally crashing on your doorstep" (Words Without Borders). With its "delightful and precocious narrator [reminiscent of] Scout in To Kill a Mockingbird," Abi-Ezzi captures both a country and a childhood plagued by a conflict that even at its darkest and most threatening, carries the promise of healing and retribution (Christian Science Monitor).

Drawing from Observation In post-WWII Russia, one boy dares to save an entire race of outlawed dogs -- the German shepherd! World War II has just ended when thirteen-year-old Mikhail finds a dying man and his German shepherd, Zasha, in the woods. It's dangerous -- some say traitorous -- to own a German dog after Germany attacked Russia, so Mikhail must keep Zasha a secret to keep her alive. But Mikhail's rival, Katia, is determined to find the dog she is sure he's hiding. At the same time, a soldier named Dimitri is breeding a new Russian dog at a nearby farm. So many dogs were lost in combat, to starvation, and in the slaughter of German dogs that the country is in dire need of every kind of dog. Dimitri, too, has suspicions of Zasha's existence, and would like nothing more than to add her to his breeding program. He'll have to compete with the armed dog thieves who are also on her trail. Mikhail's inspiring journey to save his best friend, the last German shepherd in Russia, forces him to face some of life's hardest lessons about war, hate, forgiveness, hope, love, and man's best friend.

The Secret World of Sleep In recent years neuroscientists have uncovered the countless ways our brain trips us up in day-to-day life, from its propensity toward irrational thought to how our intuitions deceive us. The latest research on sleep, however, points in the opposite direction. Where old wives tales have long advised to "sleep on a problem," today scientists are discovering the truth behind these folk sayings, and how the busy brain radically improves our minds through sleep and dreams. In The Secret World of Sleep, neuroscientist Penny Lewis explores the latest research into the nighttime brain to understand the real benefits of sleep. She shows how, while our body rests, the brain practices tasks it learned during the day, replays traumatic events to mollify them, and forges connections between distant concepts. By understanding the roles that the nocturnal brain plays in our waking life, we can improve the relationship between the two, and even boost creativity and become smarter. This is a fascinating exploration of one of the most surprising corners of neuroscience that shows how science may be able to harness the power of sleep to improve learning, health, and more.

A Girl Made of Dust Lincoln Hall's breathtaking account of surviving a night in Everest's "death zone." Lincoln Hall likes to say that on the evening of May 25, 2006, he died on Everest. Indeed, Hall attempted to climb the mountain during a deadly season in which eleven people perished. And he was, in fact, pronounced dead, after collapsing from altitude sickness. Two Sherpas spent hours trying to revive him, but as darkness fell, word came via radio from the expedition's leader that they should descend in order to save themselves. The news of Hall's death traveled rapidly from mountaineering websites to news media around the world, and ultimately to his family back in Australia. Early the next morning, however, an American guide, climbing with two clients and a Sherpa, was startled to find Hall sitting cross-legged on a sharp crest of the summit ridge. In this page-turning account of survival against all odds, Hall chronicles in fascinating detail the days and nights that led up to his fateful night in Mount Everest's "death zone." His story is all the more miraculous given his climbing history. Hall had been part of Australia's first attempt to reach the top of Everest in 1984 but had not done any major climbing for many years, having set aside his passion in order to support his family. While others in the team achieved their dream during this 1984 expedition, Hall was forced to turn back due to illness. Thus, his triumph in reaching the summit at the age of fifty is a story unto itself. So, too, is Hall's description of his family's experience back in Australia, as sudden grief turned to relief and joy in a matter of hours. Rarely has there been such a thrilling narrative of one man's encounter with the world's tallest mountain.

Enterprise Cloud Computing Phiroze Elchidana, son of a Parsi priest, falls in love with Sepideh, daughter of an old khandhia, or corpse bearer. In order to marry her, he agrees to join the caste of untouchables that carried the corpses to the Towers of Silence in Bombay.

Practical Theory, Complete In this important book, Lesley Jeffries introduces a phenomenon which has not been given the attention it deserves - the contextual construction of oppositional meaning. These are opposites not recognisable as such out of context but that are clearly set up this way in the text concerned. The significance of oppositional meaning is well-known, and has been discussed by scholars for millennia, from Philosophy to Politics. But the main emphasis has always been on the conventional opposite: the opposite recognised by lexical semantics. Starting from socio-cultural viewpoints, moving to original research and then concluding with a new theoretical formulation, this book introduces and consolidates a significant new approach to the analysis of oppositional meaning. It closes with a discussion of the importance of constructed opposition in hegemonic practice and makes a case for the inclusion of opposition as a central tool of critical discourse analysis. It is now essential reading for researchers and graduates in stylistics, linguistics and language studies.

Linux Malware Incident Response C. S. Lewis is one of the most influential Christian writers of our time. The Chronicles of Narnia has sold more than 100 million copies worldwide and all Lewis's works are estimated to sell 6 million copies annually. At the fiftieth anniversary of his death, Lewis expert Devin Brown brings the beloved author's story to life in a fresh, accessible, and moving biography through focusing on Lewis's spiritual journey. Although it was clear from the start that Lewis would be a writer, it was not always clear he would become a Christian. Drawing on Lewis's autobiographical works, books by those who knew him personally, and his apologetic and fictional writing, this book tells the inspiring story of Lewis's journey from cynical atheist to joyous Christian and challenges readers to follow their own calling. The book allows Lewis to tell his own life story in a uniquely powerful manner while shedding light on his best-known works.

Dead Lucky Rock falls can be a public safety issue. This book provides comprehensive information on identification of these hazards, and design and construction of protection methods. Rock Fall Engineering describes first, the theoretical background to rock fall behavior in terms of the impact and trajectory phases of rock falls, and second, how this information is applied to modeling of rock falls and the design of ditches, fences and sheds. The theory of rock fall behavior is verified by comparing the calculations with five carefully documented case studies. The book covers four main topics as follows: Describes causes of rock falls, including geology, climate and topography, and provides detailed documentation on rock fall impacts and trajectories at five sites with a wide variety of topographic and geologic features Discusses theory of impact mechanics, and its application to velocity and energy changes during impacts and trajectories Reviews methods of modeling rock fall events, and presents analyses for the five case studies Examines rock fall protection in terms of selecting appropriate method(s) for site conditions, and design principles in which the objective is to absorb impact energy in an efficient manner This book, which contains many worked examples, is of interest to practitioners and researchers working in the fields of geological engineering and natural hazards. Duncan C. Wyllie is a principal with Wyllie & Norrish Rock Engineers in Vancouver, Canada, and a registered professional engineer in British Columbia. He has worked on rock fall hazard projects involving the design and construction protection measures since the 1970s. He is the author of Foundations on Rock, Second Edition, and Rock Slope Engineering, Fourth Edition, both published by CRC Press.
