In post-WWII Russia, one boy dares to save an entire race of outlawed dogs -- the German shepherd! World War II has just ended when thirteen-year-old Mikhail finds a dying man and his German shepherd, Zasha, in the woods. It's dangerous -- some say traitorous -- to own a German dog after Germany attacked Russia, so Mikhail must keep Zasha a secret to keep her alive. But Mikhail's rival, Katia, is determined to find the dog she is sure he's

hiding. At the same time, a soldier named Dimitri is breeding a new Russian dog at a nearby farm. So many dogs were lost in combat, to starvation, and in the slaughter of German dogs that the country is in dire need of every kind of dog. Dimitri, too, has suspicions of Zasha's existence, and would like nothing more than to add her to his breeding program. He'll have to compete with the armed dog thieves who are also on her trail. Mikhail's inspiring journey to save his best friend, the last German shepherd in Russia, forces him to face some of life's hardest lessons about war, hate, forgiveness, hope, love, and man's best friend.

For this purpose a number of questions and problems are given at the end of each chapter.

This unusual self-help book about surviving grief offers the reader comfort and inspiration. Each of us will face some loss, sorrow and disappointment in our lives, and *The Courage to Grieve* provides the specific help we need to enable us to face our grief fully and to recover and grow from the experience. Although the book emphasizes the response to the death of a loved one, *The Courage to Grieve* can help with every kind of loss and grief. Judy Tatelbaum gives us a fresh look at understanding grief, showing us that grief is a natural, inevitable human experience, including all the unexpected, intense and uncomfortable emotions like sorrow, guilt, loneliness, resentment, confusion, or even the temporary loss of the will to live. The emphasis is to clarify and offer help, and the tone is spiritual, optimistic, creative and easy to understand. Judy Tatelbaum provides excellent advice on how to help oneself and others get through the immediate experience of death and the grief that follows, as

well as how to understand the special grief of children. Particularly useful are the techniques for completing or "finishing" grief--counteracting the popular misconception that grief never ends. The Courage to Grieve shows us how to live life with the ultimate courage: not fearing death. This book is about so much more than death and grieving it is about life and joy and growth.

Originally published in 1976, *Working Class Radicalism in Mid-Victorian England* examines working-class radicalism in the mid-Victorian period and suggests that after the fading of Chartist militancy the radical tradition was preserved in a working-class subculture that enabled working men to resist the full consolidation of middle-class hegemony. The book traces the growth of working-class radicalism as it developed dialectically in confrontation with middle-class liberal ideology in the generation after Waterloo. Intellectual forces were of central importance in shaping the character of the working-class Left and the Enlightenment, in particular, as the chief source of ideological weapons that were turned against the established order. The Enlightenment also provided the intellectual foundations of the middle-class ideology that was directed against the incipient threat of popular radicalism. The book notes that the same intellectual forces that entered into the first half of the nineteenth century also shaped the value system that provided the foundations of mid-Victorian urban culture. These forces also contributed to the rapprochement between working-class liberalism, bringing latent affinities to the surface. It is also emphasised, however, that inherited ideas and traditions exercised their influence in interaction with the structure of power and status.

A new and incisive analysis of the political viability of human rights, with an in-depth investigation of its largest violation: world hunger. Gonzalez-Pelaez develops John Vincent's theory of basic human rights within the context of the international political economy and demonstrates how the right to food has become an international norm enshrined within international law. She then assesses the international normative and practical dimensions of hunger in connection with international trade and poverty. Using the society of states as the framework of analysis, she explores the potential that the current system has to correct its own anomalies, and examines the measures that can move the hunger agenda forward in order to break through its current stagnation.

In recent years neuroscientists have uncovered the countless ways our brain trips us up in day-to-day life, from its propensity toward irrational thought to how our intuitions deceive us. The latest research on sleep, however, points in the opposite direction. Where old wives tales have long advised to "sleep on a problem," today scientists are discovering the truth behind these folk sayings, and how the busy brain radically improves our minds through sleep and dreams. In *The Secret World of Sleep*, neuroscientist Penny Lewis explores the latest research into the nighttime brain to understand the real benefits of sleep. She shows how, while our body rests, the brain practices tasks it learned during the day, replays traumatic events to mollify them, and forges connections between distant concepts. By understanding the roles that the nocturnal brain plays in our waking life, we can improve the relationship between the two, and even boost creativity and become smarter. This is a fascinating exploration of one of the most surprising corners of neuroscience that shows how science may be able to harness the power of sleep to improve learning, health, and more.

A “beautifully written, lyrical . . . completely believable” prize-winning novel about a girl’s coming of age in war-torn Lebanon (Publishers Weekly). In her peaceful town outside Beirut, Ruba is slowly awakening to the shifting contours within her household: hardly speaking and refusing to work, her father has inexplicably withdrawn from his family in favor of his favorite armchair; her once-youthful mother looks so sad that Ruba imagines her heart must have withered like a fig in the heat; and Ruba’s brother, Naji, is spending less time with Ruba than he is with older friends, some of whom carry guns. In trying to salvage her family, Ruba uncovers a secret from her father’s past. It sends her on a journey far from the fantasies of youth and into a brutal reality where men kill in the name of faith and race, old wrongs remain unforgiven, and where nothing less than self-sacrifice and unity can offer survival. But as Israeli troops invade Beirut and danger moves ever closer, Ruba realizes that she alone may not be able to keep her loved ones safe. She must first save her father. “Exquisitely affecting . . . page-turningly suspenseful . . . A Girl Made of Dust is equally gripping as a poignant family drama and as a visceral depiction of living with war literally crashing on your doorstep” (Words Without Borders). With its “delightful and precocious narrator [reminiscent of] Scout in To Kill a Mockingbird,” Abi-Ezzi captures both a country and a childhood plagued by a conflict that even at its darkest and most threatening, carries the promise of healing and retribution (Christian Science Monitor).

### Cliffhanger Writing Prompts

Lincoln Hall's breathtaking account of surviving a night in Everest's "death zone." Lincoln Hall likes to say that on the evening of May 25, 2006, he died on Everest. Indeed, Hall attempted to climb the mountain during a deadly season in which eleven people perished. And he was, in fact, pronounced dead, after collapsing from altitude sickness. Two Sherpas spent hours trying to revive him, but as darkness fell, word came via radio from the expedition's leader that they should descend in order to save themselves. The news of Hall's death traveled rapidly from mountaineering websites to news media around the world, and ultimately to his family back in Australia. Early the next morning, however, an American guide, climbing with two clients and a Sherpa, was startled to find Hall sitting cross-legged on a sharp crest of the summit ridge. In this page-turning account of survival against all odds, Hall chronicles in fascinating detail the days and nights that led up to his fateful night in Mount Everest's "death zone." His story is all the more miraculous given his climbing history. Hall had been part of Australia's first attempt to reach the top of Everest in 1984 but had not done any major climbing for many years, having set aside his passion in order to support his family. While others in the team achieved

their dream during this 1984 expedition, Hall was forced to turn back due to illness. Thus, his triumph in reaching the summit at the age of fifty is a story unto itself. So, too, is Hall's description of his family's experience back in Australia, as sudden grief turned to relief and joy in a matter of hours. Rarely has there been such a thrilling narrative of one man's encounter with the world's tallest mountain.
