Dravidian architecture or the South Indian temple style is an architectural idiom in Hindu temple architecture that emerged in the southern part of the Indian subcontinent or South India and in Sri Lanka, reaching its final form by the sixteenth century. It is seen in Hindu temples, and the most distinctive difference from north Indian styles is the use of a shorter and more pyramidal tower

Roman temple architecture was designed with a focus on front entrance. The front porch, called the portico, Roman Domestic Architecture: Development, Design & Style

In the last articles in the Hindu Temple Architecture series, we have seen the development of art and architecture in temples under the Chola, Chalukya and Hoysala rulers. There was a major movement under Pallavas even before the imperial Cholas, and the art and architecture under Pallavas co-existed in South India along with Cholas, Chaukyas and Pandyas.

Development of Stone Architecture Until roughly 650 BCE, mid-way through the Orientalizing Period (725-600 BCE), no temples were constructed in finished stone. However, from 650 BCE onwards, or thereabouts, there was a renewal of contacts and trade links between Greece and the Middle East, including Egypt, the home of stone architecture.

Tyler Pre-College Programs offer creatively driven high school students the challenging and meaningful experience of learning with other young artists at one of the nation's top schools for the study of art, design and architecture.
