This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

Lincoln Hall's breathtaking account of surviving a night in Everest's "death zone." Lincoln Hall likes to say that on the evening of May 25, 2006, he died on Everest. Indeed, Hall attempted to climb the mountain during a deadly season in which eleven people perished. And he was, in fact, pronounced dead, after collapsing from altitude sickness. Two Sherpas spent hours trying to revive him, but as darkness fell, word came via radio from the expedition's leader that they should descend in order to save themselves. The news of Hall's death traveled rapidly from mountaineering websites to news media around the world, and ultimately to his family back in Australia. Early the next morning, however, an American guide, climbing with two clients and a Sherpa, was startled to find Hall sitting cross-legged on a sharp crest of the summit ridge. In this page-turning account of survival against all odds, Hall chronicles in fascinating detail the days and nights that led up to his fateful night in Mount Everest's "death zone." His story is all the more miraculous given his climbing history. Hall had been part of Australia's first attempt to reach the top of Everest in 1984 but had not done any major climbing for many years, having set aside his passion in order to support his family. While others in the team achieved their dream during this 1984 expedition, Hall was forced to turn back due to illness. Thus, his triumph in reaching the summit at the age of fifty is a story unto itself. So, too, is Hall's description of his family's experience back in Australia, as sudden grief turned to relief and joy in a matter of hours. Rarely has there been such a thrilling narrative of one man's encounter with the world's tallest mountain.

The book shows how digital-interactive television (digiTV) will affect the relation between the broadcaster and the consumer. Standardization processes, technological paradigms, and application development issues will be discussed. The emerging applications, innovations, and future concepts are described in detail. The triangle: content - end-user - technology will be conceptualized to create a vision and to overview provision of services that will be major innovative elements in the world of digital television. From the technical side, eXtensible Markup Language (XML)-based metadata standards are a major element in realizing new innovative concepts in the world of digital, interactive television. This book clearly shows by the introduction of applications and use-scenarios, which conceptual requirements and metadata models are applicable, which metadata subsets are applicable due to resource limitations, which metadata aspects are needed for nonlinear content viewing, etc. The book gives a broad and detailed both visionary and technical overview useful for graduates, engineers, and scientists; and last but not least decision-makers in the broadcasting industry.

An indispensable guide to understanding—and living or working with—people whose behavior leaves you frustrated and confused We all have people in our lives who frustrate, annoy, or hurt us: workplace bullies, those who always claim to be right, or those with anxious or obsessive personalities. And most of us hurt others occasionally, too. Now, authors Dr. Helen McGrath, a clinical psychologist and professor, and Hazel Edwards, a professional writer, offer this highly readable, extremely practical guide to dealing with the difficult personalities we encounter every day—in others, and in ourselves. Taking the American Psychiatric Association's widely used Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) as its starting point, *Difficult Personalities* helpfully outlines over a dozen different personality traits and types, detailing their common characteristics and underlying motivations. It also equips readers with numerous strategies for dealing with difficult behavior, including: • Anger and conflict management • Optimism and assertion training • Rational and empathic thinking • Reexamining your own personality. Readers will also benefit from sections on making difficult decisions and maintaining romantic relationships. Perfect for anyone who has ever wished that other people came with a handbook, *Difficult Personalities* illuminates the personality differences that so often serve as barriers to cooperation in the workplace and harmony at home.

This volume examines the causes and purposes of 'post-conflict' violence. The end of a war is generally expected to be followed by an end to collective violence, as the term 'post-conflict' that came into general usage in the 1990s signifies. In reality, however, various forms of deadly violence continue, and sometimes even increase after the big guns have been silenced and a peace agreement signed. Explanations for this and other kinds of violence fall roughly into two broad categories – those that stress the legacies of the war and those that focus on the conditions of the peace. There are significant gaps in the literature, most importantly arising from the common premise that there is one, predominant type of post-war situation. This 'post-war state' is often endowed with certain generic features that predispose it towards violence, such as a weak state, criminal elements generated by the war-time economy, demobilized but not demilitarized or reintegrated ex-combatants, impunity and rapid liberalization. The premise of this volume differs. It argues that features which constrain or encourage violence stack up in ways to create distinct and different types of post-war environments. Critical factors that shape the post-war environment in this respect lie in the war-to-peace transition itself, above all the outcome of the war in terms of military and political power and its relationship to social hierarchies of power, normative understandings of the post-war order, and the international context. This book will of much interest to students of war and conflict studies, peacebuilding and IR/Security Studies in general.

Design Primer for Hot Climates offers a discussion of architecture and planning for hot climates. The hot tropical and sub-tropical regions contain most of the world's population and, it is here that the majority of new buildings will be built. For this reason this book concentrates on these regions but serves only as a broad outline of the climatic, environmental, and technological conditions. The book begins with a discussion of climatic elements, climatic zones, and comfort. This is followed by separate chapters on climatic design; regional hazards (e.g., condensation, lightning, storms, earthquakes, etc.) that must be considered during the design stage; and factors such as site accessibility, materials selection, water and labor supply, and building regulations and standards. This book is meant not only for designers from temperate climatic areas but also for those who live in these regions, in the hope that they will be stimulated to re-examine conditions which may have become over-familiar to them.

According to this bestselling author, diabetes is not a disease; in the vast majority of cases, it is a complex mechanism of protection or survival that the body chooses to avoid the possibly fatal consequences of an unhealthy diet and lifestyle. Despite the body's ceaseless self-preservation efforts (which we call diseases), millions of people suffer or die unnecessarily from such consequences. The imbalanced blood sugar level in diabetes is but a symptom of illness, not the illness itself. By developing diabetes, the body is neither doing something wrong nor is it trying to commit suicide. The current diabetes epidemic is man-made, or rather, factory-made, and, therefore, can be halted and reversed through simple but effective changes in diet and lifestyle. Diabetes - No More provides you with essential information on the various causes of diabetes and how anyone can avoid them. To stop the diabetes epidemic we need to create the right circumstances that allows the body to heal. Just as there is a mechanism to become diabetic, there is also a mechanism to reverse it. Find out how!

Dew in the Morning was written when the author, Shimmer Chinodya, was eighteen. The intensity of childhood memory is sharp and immediate. Godi, the young boy whose life we experience as he grows up, perceives more than he understands. The ambivalence or instability of the text lies at the juncture between the felt experience of the child, and the rational, interpretative, analysis of the adult. A Bildungsroman, Chinodya captures the centrality of land in the national consciousness: its beauty, its rhythms, its seasons and its fertility. But he does not romanticise the hardships: the droughts, poor harvests, over-crowding – particularly as a result of the inflow of resettled people – and the tensions over land and between peoples as they struggle to survive. Good humour, strict morality, hard work, and mutual support can be undermined by corrupt practice, or tainted by traditional ceremonies that are as frightening as they are powerful, and raise essential questions of belief and validity. Dew in the Morning, is a tender, evocative novel of growing up, but in it we see the seeds of many issues which Chinodya will dwell on in his later novels: familial tensions, the taut interplay of tradition and modernity, ancestral beliefs and Christianity.
