X-kit FET Grade 12 ACCOUNTING Using recently released archival materials from the United States and Europe, Replacing France: The Origins of American Intervention in Vietnam explains how and why the United States came to assume control as the dominant western power in Vietnam during the 1950s. Acting on their conviction that American methods had a better chance of building a stable, noncommunist South Vietnamese nation, Eisenhower administration officials systematically ejected French military, economic, political, bureaucratic, and cultural institutions from Vietnam. Kathryn C. Statler examines diplomatic maneuvers in Paris, Washington, London, and Saigon to detail how Western alliance members sought to transform South Vietnam into a modern, westernized, and democratic ally but ultimately failed to counter the Communist threat. Abetted by South Vietnamese prime minister Ngo Dinh Diem, Americans in Washington, D.C., and Saigon undermined their French counterparts at every turn, resulting in the disappearance of a French presence by the time Kennedy assumed office. Although the United States ultimately replaced France in South Vietnam, efforts to build South Vietnam into a nation failed. Instead, it became a dependent client state that was unable to withstand increasing Communist aggression from the North. Replacing France is a fundamental reassessment of the origins of U.S. involvement in Vietnam that explains how Franco-American conflict led the United States to pursue a unilateral and ultimately imperialist policy in Vietnam.

Computer Fundamentals, Architecture & Organisation This revelatory history of the elusive National Security Council shows how staffers operating in the shadows have driven foreign policy clandestinely for decades. When Michael Flynn resigned in disgrace as the Trump administration's national security advisor the New York Times referred to the National Security Council as "the traditional center of management for a president's dealings with an uncertain world." Indeed, no institution or individual in the last seventy years has exerted more influence on the Oval Office or on the nation's wars than the NSC, yet until the explosive Trump presidency, few Americans could even name a member. With key analysis, John Gans traces the NSC's rise from a collection of administrative clerks in 1947 to what one recent commander-in-chief called the president's "personal band of warriors." A former Obama administration speechwriter, Gans weaves extensive archival research with dozens of news-making interviews to reveal the NSC's unmatched power, which has resulted in an escalation of hawkishness and polarization, both in Washington and the nation at large.

Bilum Books **BUSINESS STUDIES Grades 11 and 12 Past Exam Questions** Charles C. McDougal lived in Asia for twenty years, including ten years in the Philippines from 1972 to 1982. His impeccable research stems from an academic background whose credentials include a bachelor of science degree from the University of Georgia, a master's degree from the Asian Institute of Management, and a doctorate in business from the University of the Philippines. The data he gathered for his doctoral dissertation was the genesis of his 1987 book "The Marcos File", which exposed the Marcos regime for its corruption and excesses. It was while working on a book about Marcos' hidden wealth that he stumbled on the story of a treasure hunt headed by Marcos. His close friendship with the national security director provided him access to the corridors of power. He was asked to find out the truth, both about the legendary treasure and the Marcos gold. His academic credentials, plus his military background-- he was a captain in the Green Berets in Vietnam-- made him a natural choice. He returned to the Philippines. A cave-in killed two of his men and overnight this top-secret operation made the front page of almost every major newspaper in the world.
