An ideal reference source for the experienced practitioner as well as a tool for the more general environmental lawyer, The Clean Air Act Handbook provides a broad and balanced perspective of the statute and the EPA's implementing regulations and policy guidance. Bringing together the knowledge of 31 private and public sector CAA practitioners, it covers the entire statute as well as the more recent amendments. The first concerns processes that are primarily physical, such as mixing, and the second processes that also involve biochemical changes, such as thermal sterilization. While the third section addresses some broader issues, such as how to tour a plant, how to choose among building a new plant, expanding or renovating; and how to develop processes. The essays in this collection examine the connections between the forces of empire and women's lives in the early Americas, in particular the ways their narratives contributed to empire formation. Focusing on the female body as a site of contestation, the essays describe acts of bravery, subversion, and survival expressed in a variety of genres, including the saga, letter, diary, captivity narrative, travel narrative, verse, sentimental novel, and autobiography. The volume also speaks to a range of female experience, across the Americas and across time, from the Viking exploration to early nineteenth-century United States, challenging scholars to reflect on the implications of early American literature even to the present day. In post-WWII Russia, one boy dares to save an entire race of outlawed dogs -- the German shepherd! World War II has just ended when thirteen-year-old Mikhail finds a dying man and his German shepherd, Zasha, in the woods. It's dangerous -- some say traitorous -- to own a German dog after Germany attacked Russia, so Mikhail must keep Zasha a secret to keep her alive. But Mikhail's rival, Katia, is determined to find the dog she is sure he's hiding. At the same time, a soldier named Dimitri is breeding a new Russian dog at a nearby farm. So many dogs were lost in combat, to starvation, and in the slaughter of German dogs that the country is in dire need of every kind of dog. Dimitri, too, has suspicions of Zasha's existence, and would like nothing more than to add her to his breeding program. He'll have to compete with the armed dog thieves who are also on her trail. Mikhail's inspiring journey to save his best friend, the last German shepherd in Russia, forces him to face some of life's hardest lessons about war, hate, forgiveness, hope, love, and man's best friend. Sebottendorff explains how the mysterious abbreviated letters found in the Qur'an represent formulas for perfecting the spirit of the individual. When combined with Masonic hand signs and grips and conducted accordingly to a precise schedule, these formulas incorporate spiritual power into the body and transform the soul from its base state into a noble, godlike state: the Magnum Opus of the medieval alchemists. Laying out the complete program of spiritual exercises, Sebottendorff explains each abbreviated word-formula in the Qur'an, the hand gestures that go with them, and the exact order and duration for each exercise. For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life. All-American Anarchist chronicles the life and work of Joseph A. Labadie (1850-1933), Detroit's prominent labor organizer and one of early labor's most influential activists. A dynamic participant in the major social reform movements of the Gilded Age, Labadie was a central figure in the pervasive struggle for a new social order as the American Midwest underwent rapid industrialization at the end of the nineteenth century. This engaging biography follows Labadie's colorful career from a childhood among a Pottawatomi tribe in the Michigan woods through his local and national involvement in a maze of late nineteenth-century labor and reform activities, including participation in the Socialist Labor party, Knights of Labor, Greenback movement, trades councils, typographical union, eight-hour-day campaigns, and the rise of the American Federation of Labor. Although he received almost no formal education, Labadie was a critical thinker and writer, contributing a column titled "Cranky Notions" to Benjamin Tucker's Liberty, the most important journal of American anarchism. He interacted with such influential rebels and reformers as Eugene V. Debs, Emma Goldman, Henry George, Samuel Gompers, and Terence V. Powderly, and was also a poet of both protest and sentiment, composing more than five hundred poems between 1900 and 1920. Affectionately known as Detroit's "Gentle Anarchist," Labadie's flamboyant and amiable personality counteracted his caustic writings, making him one of the city's most popular figures throughout his long life despite his dissident ideas. His individualist anarchist philosophy was also balanced by his conventional personal life—he was married to a devout Catholic and even worked for the city's water commission to make ends meet. In writing this biography of her grandfather, Carlotta R. Anderson consulted the renowned Labadie Collection at the University of Michigan, a unique collection of protest literature which extensively documents pivotal times in American labor history and radical history. She also had available a large collection of family scrapbooks, letters, photographs, and Labadie's personal account book. Including passages from Labadie's vast writings, poems, and letters, All-American Anarchist traces America's recurring anti-anarchist and anti-radical frenzy and repression, from the 1886 Haymarket bombing backlash to the Red Scare of the twentieth century. As industry professionals focus on specific environmental subjects they become less familiar with environmental problems and solutions outside their area of expertise. This situation is compounded by the fact that many environmental science related terms are confusing. Prefixes such as bio-, enviro-, hydra-, and hydro- are used so frequently that it is often hard to tell the words apart. The Environmental Engineering Dictionary and Directory gives you a complete list of brand terms, brand names, and trademarks - right at your fingertips.
