Jul 11, 2019 · Hand injury is caused by fall on outstretched arm, direct impact to hand during work or auto accident. Hand injury may be associated with skin laceration, penetration or contusion of the hand. Laceration and penetration often results in hand infection followed by tendonitis.

Clark CE, et al. Prevalence of systolic inter-arm differences in blood pressure for different primary care populations: Systematic review and meta-analysis. The British Journal of General Practice. 2016;66:e838. Clark CE, et al. Systolic inter-arm blood pressure difference and risk of ...

Jul 01, 2011 · Abstract Background. Vascular access-site complications are an important cause of morbidity following catheterization procedures. Manual compression is the “gold standard” in achieving hemostasis of an arteriotomy site; however, manual compression is limited by the need to interrupt anticoagulation, prolonged bed rest, patient discomfort and time demands for healthcare providers.

We are pleased to announce a new free Case Based Urology Learning Program from the Cleveland Clinic Glickman Urological and Kidney Institute, Rainbow Babies and Children’s Hospital, and University Hospitals Case Medical Center.
