Negotiation is a critical skill needed for effective management. Negotiation 7e by Roy J. Lewicki, David M. Saunders, and Bruce Berry explores the major concepts and theories of the psychology of bargaining and negotiation, and the dynamics of interpersonal and intergroup conflict and its resolution. It is relevant to a broad spectrum of management students, not only human resource management or industrial relations candidates.

Safe and effective structural firefighting requires a complex thought process. It is not a simple matter of "how to." Decisions depend on many factors, from the type of building, to the likelihood of occupancy, to the water supply. The third edition of Structural Firefighting: Strategy and Tactics leads readers through all phases of planning, evaluation and implementation to enable them to effectively manage structure fire incidents safe and effective manner, regardless of size or complexity. The third edition has been revised to thoroughly cover the practical applications and limitations of the

latest research from Underwriters Laboratories (UL) and National Institute of Standards and Technology (NIST).

fire fighters, prospective fire fighters, and fire science students. This edition continues the Brannigan tradition of using plain language to describe technical information about different building types and their unique hazards. This text ensures that critical fire fighting information is easy-to-understand and gives valuable experience to fire fighters before stepping onto the fireground. The first edition of Building Construction for the Fire Service was published in 1971. Frank Brannigan was compelled to write the most comprehensive building construction text for the fire service so that he could save fire fighters' lives. His passion for detail and extensive practical experience helped him to develop the most popular text on the market. His motto of: "Know your buildings," informs every aspect of this new edition of the text. Listen to a Podcast with Brannigan's Building Construction for the Fire Service, Fourth Edition co-author Glenn Corbett to learn more about this training program! Glenn discusses his relationship with the late Frank Brannigan, the dangers of heavy construction timber, occupancy specific hazards, and other areas of emphasis within the Fourth Edition. Fire and Emergency Services Instructor Eighth Edition helps students meet the job performance requirements of NFPA(R) 1041, Standard for Fire Service Instructor Professional Qualifications (2012) for Instructor levels I, II, and III. The manual also provides a reference for instructors who may perform duties outside of their current certification levels. This new edition has been reorganized to provide clearer separations between the three instructor levels: Ch. 1-9 cover Level I; Ch. 10-14, Level II; and Ch. 15-17 Level III. The text has been shortened from 22 chapters to 17. As a result, the text is more concise and easier to teach. The text reflects new changes in the NFPA(R) standard, including a discussion of bias in instructional and testing materials.

FSTA NEW Editions Streamline Driver/Operator Training The new editions of these bestselling IFSTA fire apparatus driver/operator training materials mark a new approach to training driver/operators. Previously, IFSTA published two separate manuals with student and instructor support materials: *Pumping Apparatus Driver/Operator Handbook* and *Aerial Apparatus Driver/Operator Handbook*. Fire departments with both types of apparatus needed two manuals, two curriculum and driver/operator trainees needed two exam preps to study for tests. The release of the 3rd edition of these manuals streamlines the IFSTA training resources. The *Pumping Apparatus Driver/Operator Handbook, 3rd Edition* covers pumping apparatus only, the second book in the pair, *Pumping and Aerial Apparatus Driver/Operator Handbook, 3rd Edition* contains the same 15 chapters as the pumping apparatus textbook, plus an additional 5 chapters relevant to aerial apparatus. Personnel on departments that operate both types of apparatus now only need one manual and one curriculum for training. Students only need one exam prep to prepare for testing. If a fire department does not use aerial apparatus, they use the *Pumping Apparatus Driver/Operator Handbook, 3rd Edition* and omit the aerial sections of the curriculum and exam prep which include all 20 chapters. Chapters 2 and 3 are especially beneficial for all driver/operators: *Inspection and Maintenance and Safety and Operating Emergency Vehicles*. *Pumping Apparatus Driver/Operator Handbook, 3rd edition Skill Sheets* now included in the manual *Key Terms* added The new Fire Apparatus Manufacturer's Association (FAMA) standardized safety signs for fire apparatus are highlighted Hydraulic calculations presented in a logical sequence making teaching and learning easier Customary and metric calculations in one chapter NEW case histories

[Fire Investigator: Principles and Practice to NFPA 921 and 1033](#)

Evidence-Based Practices for Strategic and Tactical Firefighting is a synopsis of the UL/NIST research studies and experiments on fire behavior and techniques for ventilation, fire suppression, and search and rescue as a result of the changes in modern building construction and furnishing materials. As a result of these changes, today's fires release energy faster, reach flashover potential sooner, may reach higher temperatures, and are much more likely to become ventilation-limited than building fires of even a few years ago. Developed in partnership with the International Association of Fire Chiefs (IAFC) and National Fire Protection Association (NFPA), Evidence-Based Practices for Strategic and Tactical Firefighting details many of the findings discovered as the result of an ongoing series of experiments conducted by NIST, UL, and the New York City Fire Department (FDNY) and provides the most up-to-date information available today for Fire Fighter, Fire Officer, and Fire Science students. Additional information about these and other fire experiments can be obtained online at the NIST website by searching under Fire Fighting Technology and at the UL website by searching under Fire Fighter Safety Research Institute.

" Be a better decision maker and incident commander at structure fires! This all new book provides strategy and tactics for the incident commander arriving at structure fire incidents using the available responding resources. Learn to assess the fire situation, initiate a command structure, and deploy resources until the transfer of command or termination of the incident. The NEW fire dynamics content includes the latest research on fire behavior from UL and NIST with all new photographs and drawings that illustrate these new fire science concepts. Read and see the new science so that you can apply it to structure fires. Strategies and tactics from national experts are presented and applied to hypothetical structure fire scenarios throughout the book. The target audience is all career and volunteer personnel who respond to single and multifamily dwellings incidents, commercial occupancies, and unique target or special hazards events. The manual meets the requirements of the FESHE course outcomes for the Associates level course, "Strategies and Tactics." This manual also broadens the knowledge of the strategy and tactics JPR's in NFPA® 1021, Standard for Fire Officer Professional Qualifications. The manual is the best choice for use in training agencies, college degree programs, and as a resource for firefighters and fire officers who serve as, or are training to be, incident commanders. Additional standards referenced in the manual include NFPA 920, 921, 400. Each of the last three (3) chapters include five (5) training scenarios that reflect real incidents that an incident commander will find when responding to a residential structure, a commercial structure fire and a structure fire with special hazards."
