"A meticulously researched tour de force" on politics, big agriculture, and the need to go beyond farmers' markets to find fixes (Publishers Weekly). Wenonah Hauter owns an organic family farm that provides healthy vegetables to hundreds of families as part of the Community Supported Agriculture (CSA) movement. Yet, as a leading healthy-food advocate, Hauter believes that the local food movement is not enough to solve America's food crisis and the public health debacle it has created. In Foodopoly, she takes aim at the real culprit: the control of food production by a handful of large corporations—backed by political clout—that prevents farmers from raising healthy crops and limits the choices people can make in the grocery store. Blending history, reporting, and a deep understanding of farming and food production, Foodopoly is a shocking, revealing account of the business behind the meat, vegetables, grains, and milk most Americans eat every day, including some of our favorite and most respected organic and health-conscious brands. Hauter also pulls the curtain back from the little-understood but vital realm of agricultural policy, showing how it has been hijacked by lobbyists, driving out independent farmers and food processors in favor of the likes of Cargill, Tyson, Kraft, and ConAgra. Foodopoly shows how the impacts ripple far and wide, from economic stagnation in rural communities to famines overseas, and argues that solving this crisis will require a complete structural shift—a change that is about politics, not just personal choice.

The Invention of Telepathy explores one of the enduring concepts to emerge from the late nineteenth century. Telepathy was coined by Frederic Myers in 1882. He defined it as 'the communication of any kind from one mind to another, independently of the recognised channels of sense'. By 1901 it had become a disputed phenomenon amongst physical scientists yet was the 'royal road' to the unconscious mind. Telepathy was discussed by eminent men and women of the day, including Sigmund Freud, Thomas Huxley, Henry and William James, Mary Kingsley, Andrew Lang, Vernon Lee, W.T. Stead, and Oscar Wilde. Did telepathy signal evolutionary advance or possible decline? Could it be a means of binding the Empire closer together, or was it used by natives to subvert imperial communications? Were women more sensitive than men, and if so why? Roger Luckhurst investigates these questions in a study that mixes history of science with cultural history and literary analysis. The international bestselling series returns for a new generation with a fresh look and bonus content from the legends of Deltora. Lief, Barda, and Jasmine--three companions with nothing in common but their hatred of the enemy--are on a perilous quest to recapture the seven lost gems of the magic Belt of Deltora. Only when the Belt is complete can the evil Shadow Lord be overthrown. They have succeeded in finding the golden topaz and the great ruby. The two gems' mysterious powers have strengthened them and given them courage to move on in their search for the third stone. But none of them can know the horrors that await them in the forbidden City of the Rats. The African Lion, Dr Chika Onyeani, is back and roaring. The author of the phenomenally successful Capitalist Nigger offers a new collection of his speeches, articles and other writings over the last fifteen years. In Roar of the African Lion, Dr Onyeani's unblinking gaze and plain speaking are directed at many of the burning issues of the day. He outlines his revolutionary Spider Web Doctrine—aimed at financial self-reliance and the upliftment of black communities—and attacks the parasitic leaders whose greed has robbed the people of Africa of opportunities for advancement and development since their liberation. He is equally scornful of the failures of the African elite to influence the direction of their countries, and has trenchant comments to make about racism, xenophobia and hypocrisy in Africa, America and elsewhere. Dr Onyeani also tackles the persistence of slavery on the continent, the West's ambivalent attitude to aid and debt relief, rampant corruption and 'whiteness' of Barack Obama. Looking to the future, he cautions Africa to be wary of China's embrace and to pursue its own solutions to African problems. The Emerald Tablet—an ancient document that contains the essence of the alchemical teachings—has had an important influence on many Western spiritual and religious traditions. Ostensibly concerned with turning base metals into gold, alchemy was in fact dedicated to transforming the lead of self into the gold of spirit. This brilliant history of alchemy traces its sources back to ancient Egypt, and presents alchemy as a useful, practical system of self-transformation. Each of the seven steps of alchemical transformation is explained, with hands-on techniques and exercises, treating alchemy as a living discipline for achieving a spiritual awakening. When photographer Karan Seth comes to Bombay intent on immortalizing a city charged by celebrity and sensation, he is instantly drawn in by its allure and cruelty. Along the way, he discovers unlikely allies: Samar, an eccentric pianist; Zaira, the reclusive queen of Bollywood; and Rhea, a married woman who seduces Karan into a tender but twisted affair. But when an unexpected tragedy strikes, the four lives are irreparably torn apart. Flung into a Fitzgeraldian world of sex, crime and collusion, Karan learns that what the heart sees the mind's eye may never behold. It's also a profoundly moving meditation on love's betrayal and the redemptive powers of friendship. The Pulitzer Prize-winning historian talks with some of twentieth century's most iconic musicians—"Riveting . . . Just about every interview has a revelation" (San Francisco Chronicle). Through the second half of the twentieth century, Studs Terkel hosted the legendary radio show "The Wax Museum," presenting Chicago's music fans with his inimitable take on music of all kinds, from classical, opera, and jazz to gospel, blues, folk, and rock. Featuring more than forty of Terkel's conversations with some of the greatest musicians of the past century, And They All Sang is "a tribute to music's universality and power" (Philadelphia Inquirer). Included here are fascinating conversations with Louis Armstrong, Leonard Bernstein, Big Bill Broonzy, Bob Dylan, Dizzy Gillespie, Mahalia Jackson, Janis Joplin, Rosa Raisa, Pete Seeger, and many others. As the esteemed music critic Anthony DeCurtis wrote in the Chicago Tribune, "the terms 'interview' or 'oral history' don't begin to do justice to what Terkel achieves in these conversations, which are at once wildly ambitious and as casual as can be." Whether discussing Enrico Caruso's nervousness on stage with opera diva Edith Mason or the Beatles' 1966 encounter in London with revered Indian sitar player Ravi Shankar, "Terkel's singular gift for bringing his subjects to life in their own words should strike a chord with any music fan old enough to have replaced a worn-out record needle" (The New York Times). "Whether diva or dustbowl balladeer, Studs treats them all alike, with deep knowledge and an intimate, conversational approach . . . as this often remarkable book shows, Studs Terkel has remained mesmerized by great music throughout his life." —The Guardian "[Terkel's] expertise is evident on every page,

whether debating the harmonic structure of the spirituals or discerning the subtleties of Keith Jarrett's piano technique . . . As ever, he is the most skillful of interviewers." —The Independent "What makes And They All Sang a rousing success isn't just Terkel's phenomenal range and broad knowledge, it's his passionate love of the music and his deep humanity." —San Francisco Chronicle Rather than abandoning their foreign ways as they assimilated into the mainstream of American life, immigrant groups have loudly proclaimed their ethnic uniqueness and have found renewed relevance and comfort in embracing aspects of their cultural heritages. This volume's collection of essays deal with one of America's most powerful social forces of the last twenty years, the new ethnicity, and its impact on minority groups and American society. At an unconventional English boarding school where the school motto is "Life is dangerous," students discover something sinister when they stumble into subterranean tunnels left over from World War II. For fans of Alice Munro and Lorrie Moore. A young girl, renamed Amerika in honour of the US role in the liberation of Kuwait, finds her name has become a barometer of her country's growing hostility towards the West. A middle-aged man dying from cancer looks back on his extramarital affairs and the abiding forgiveness of his wife. The headlines tell of war, unrest and religious clashes. But if you look beyond them you will see life in the Middle East as it is really lived - adolescent love, the fragility of marriage, pain of the most quotidian kind. Mai Al-Nakib's luminous stories unveil the lives of ordinary people - and the power of objects to hold extraordinary memories. Get the Key to the Boardroom with Powerful Executive Presence! "This book can be a key aid in helping you make it to the next level! Great coaching for anyone who is even thinking of becoming an executive!" Marshall Goldsmith, New York Times bestselling author of What Got You Here Won't Get You There "On the corporate battlefield a true leader's success is based upon his or her ability to communicate effectively, persuade others to follow a goal, and execute it. This leads to success for all. When the stakes are high, you're well advised to read this book first." Scott A. Gaines, vice president, Hertz Corporation "If you are seriously looking to be perceived in the light you choose, Executive Presence is the book that not only answers the question, but shows you how to apply the answers." Kevin Hogan, author of The Psychology of Persuasion "Harrison Monarth is a first-rate thinker who writes as clearly as he thinks. No matter where you are on the career ladder, Executive Presence will put you a step ahead of your competition." T. Scott Gross, author of Positively Outrageous Service "Most people know that to move up in your career, you need to have self-awareness and the ability to manage the perceptions of those whose opinions count. . . . Executive Presence is your comprehensive guide to help you become more proficient at self-marketing and the art of ethical persuasion to achieve your personal and professional goals." Larina Kase, PsyD, MBA, author of The Confident Leader and coauthor of the New York Times bestseller The Confident Speaker About the Book An expert in coaching high-level players in the art of perception management, Harrison Monarth reveals the critical difference between CEOs and those of us who wish to be CEOs. It's not a matter of intelligence, connections, or luck. It can be summed up in two words: executive presence. While most of us toil in obscurity and expect great things to follow, those on the path to corporate leadership spend their time perfecting the types of leadership communication skills that generate respect and get others to share their vision. They use these skills to establish how they are perceived by others and to manage their reputation throughout the organization. In other words, these soon-to-be top players have developed the presence of an executive through careful image management—and they make sure they have the goods to back it up. In Executive Presence, Monarth shows how you can seize control of your own career using the same skills. Inside, he explains how to: Accurately "read" people and predict their behavior Influence the perceptions of others Persuade those of opposing views to your side Create and maintain a personal "brand" Manage and control your online reputation Perform damage control when things go wrong Monarth's conclusions aren't based solely on his keen insight and extensive experience; they're the result of the latest scientific research in interpersonal communication and human behavior. Talent and skills are important, but they alone won't take you to the top of your organization. People reach highly influential positions because they deeply understand the power of perception and know how to leverage it in their favor. The good news is, anyone with the will to succeed can do it. Executive Presence provides all the techniques you need to take your career to the highest level of any organization. His study, now with a new preface, shows why this ethnic enclave has garnered national attention.
