SAP IQ - Wikipedia

In this way you can find out if your target SAP HANA database is already running at peak performance or if it needs to be optimized for the mass import of migrated data. The behavior of this combined benchmark is very similar to a real migration run since the exported data is really imported into the target HANA database.

Optimizing DMO Performance | SAP Blogs

The adapter for SAP IQ as a near-line solution is delivered with the BW system. The Integration of SAP IQ makes it possible for you to separate data that you access frequently from data that you access rarely, thus making less demand on the resources in the BW system. The near-line data is stored in compressed form.
