In the final and fifth part, future challenges and opportunities for community-based tourism initiatives are considered, and research-based sustainable solutions are proposed. Overall, the book considers engaging local populations in tourism development as a way of building stronger and more resilient communities. Section three evaluates relevant environmental policy and management mechanisms for the impacts of tourism on the natural environment. The Routledge Handbook on Tourism in the Middle East and North Africa examines the importance of tourism as a historical, economic, social, environmental, religious and political force in the Middle East and North Africa (MENA). It highlights the ecological and resource challenges related to water, desert environments, climate change and oil. It provides an in-depth analysis of the geopolitical conditions that have long determined the patterns of tourism demand and supply throughout the region and how these play out in the everyday lives of residents and destinations as they attempt to grow tourism or ignore it entirely. While cultural heritage remains the primary tourism asset for the region as a whole, many new types of tourism are emerging, especially in the Arabian Gulf region, where hyper-development is closely associated with the increasingly prominent role of luxury real estate and shopping, retail, medical tourism, cruises and transit tourism. The growing phenomenon of an expatriate workforce, and how its segregation from the citizenry creates a dual socio-economic system in several countries, is unmatched by other regions of the world. Many indigenous people of MENA keep themselves apart from other dominant groups in the region, although these social boundaries are becoming increasingly blurred as tourism, being one socio-economic force for change, has inspired many nomadic peoples to settle into towns and villages and rely more on tourists for their livelihoods. All of these issues and more shape the foundations of this book. This Handbook is the first of its kind to examine tourism from a broad regional and inclusive perspective, surveying a broad range of social, cultural, heritage, ecological and political matters in a single volume. With a wide range of contributors, many of whom are natives of the Middle East and North Africa, this Handbook is a vital resource for students and scholars interested in Tourism, Middle East Studies and Geography.

Tourism is an economic and social phenomenon that is centered on a tourist's experience and is dependent on the experiences that are co-created and provided to tourists. Tourism destination managers must understand what tourists perceive as engaging, intense, and memorable in order to remain successful. However, care must also be given to the residents' perception of local tourism development and how it impacts their community. This is a fundamental aspect for tourism development since host communities that support tourism development tend to be more hospitable with tourists, which influences their satisfaction and loyalty. Moreover, the interaction with residents of host communities is a crucial component of the quality of the tourist experience, contributing to the long-term success and sustainability of destinations. The The Handbook of Research on Resident and Tourist Perspectives on Travel Destinations is a collection of innovative research that examines travel destinations from the resident and tourist perspectives in order to better support and inform the tourism development process and to make the destinations attractive to visitors while at the same time contributing to resident quality of life and happiness. While highlighting topics including sustainable development, hotel management, and customer satisfaction, this book is ideally designed for government officials, tour developers, travel agencies, brand managers, advertising agencies, restaurateurs, public administrators, hotel managers, tourist industry professionals, academicians, researchers, and students.

Consumer behaviour is one of the most explored topics in tourism and hospitality marketing, interchangeably denoted by the terms 'traveller behaviour', 'tourist behaviour' or 'guest behaviour'. Consumer behaviour acts as an origin for every tourism and hospitality marketing activity. It offers an understanding of why people tend to choose certain products or services and what sort of factors influence them in making their decision. The decision process of buying tourism products or services takes time, because they are mostly intangible in nature due to which there are many risks involved in their buying process. The Routledge Handbook of Consumer Behaviour in Hospitality and Tourism aims to explore and critically examine current debates, critical reflections of contemporary ideas, controversies and pertinent queries relating to the rapidly expanding discipline of consumer behaviour in hospitality and tourism. The Handbook offers a platform for dialogue across disciplinary and national boundaries and areas of study through its diverse coverage. It is divided into six parts: Part I offers an overview of consumer behaviour; Part II focuses on the service quality perspectives of consumer behaviour; Part III deliberates on customer satisfaction and consumer behaviour linkages; Part IV explores the re-patronage behaviour of consumers; Part V addresses the vital issues concerning online consumer behaviour; and Part VI elaborates upon other emerging paradigms of consumer behaviour. Although there is no dearth of empirical studies on different viewpoints of consumer behaviour, there is a scarcity of literature providing conceptual information. The present Handbook is organised to offer a comprehensive theoretical body of knowledge narrating consumer behaviour, especially for hospitality and tourism businesses and operations. It attempts to fill this research gap by offering a 'globalised' volume comprising chapters

organised using both practical and academic approaches. This Handbook is essential reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, International Business and Consumer Behaviour.

"This book examines the strategic, tactical, and operational perspectives of smart technologies in the tourism industry"--

In recent years, the increasing number of tourists traveling to specific urban and resort destinations has caused challenges for the effective management of tourism in these areas, with a resulting negative impact on towns, cities, and host communities. Such issues have included placing undue pressure on infrastructure; destruction of the physical, economic, and socio-cultural environment; and affecting the quality of residents' daily lives by impacting their mobility and, in some cases, the price and rent of resident accommodation, goods, and services. To achieve a certain level of balance between the interests of local residents and visitors, new regulatory measures and legislation in high tourism areas must be discussed. The Handbook of Research on the Impacts, Challenges, and Policy Responses to Overtourism is a collection of innovative research on best practices and legislation solutions for the management of tourism destinations suffering from overtourism, tourismophobia, or antitourism movement issues. While highlighting topics including overcrowding, social displacement, and tourism management, this book is ideally designed for local government officials, policymakers, lawmakers, researchers, entrepreneurs, industry professionals, travel agencies, hotels, academicians, and students seeking current innovative empirical research on destination-management practices and application techniques.

This book examines the contribution and importance of alliances and partnerships to the tourism, travel and leisure industries. It concludes by providing management and marketing implications and recommendations for tourism business, destination managers and local planners to enable them to successfully operate such alliances.
